Cancer Letters, 38 (1987/1988) 369–371
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 38

2-Acetylaminofluorene, circulating epoxide hydrolase immunodeterminants in rats bearing hyperplastic nodules induced by, 347
Adriamycin and adriamycin cytoxicity, the relationship between membrane permeability to, in CHO cells at elevated temperatures, 129
Adriamycin cytotoxicity, adriamycin and, the relationship between membrane permeability to, in CHO cells at elevated temperatures, 129
AGGA, A bleomycin-amsacrine hybrid derivative, DNA-synthesis and tumor growth inhibition by, 321
Anthracene, differential stereoselectivity in the metabolism of benzo[*a*]pyrene and, by rabbit epidermal and hepatic microsomes, 57
Antiproliferative response of human leukemic cells. Modulation of cytosolic protein kinase C activity by phytohemagglutinin, 181
L-Ascorbic acid requirement prolonged survival in ODS rats and their susceptibility to urinary bladder carcinogenesis by *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, assessment of, 275

Benzamidine derivatives, differential effects of, on the expression of C-MYC and HLA-DR_α genes in a human B-lymphoid tumor cell line, 297
Benzo[*a*]pyrene, differential stereoselectivity in the metabolism of, and anthracene by rabbit epidermal and hepatic microsomes, 57
N-Butyl-*N*-(4-hydroxybutyl)nitrosamine, assessment of L-ascorbic acid requirement for prolonged survival in ODS rats and their susceptibility to urinary bladder carcinogenesis by, 275
Butylated hydroxyanisole (BHA), butylated hydroxytoluene (BHT) and 3,3′,4′,5,7-pentahydroxyflavone (quercetin), initiating potential of 2-(2-furyl)-3-(5-nitro-2-furyl)-acrylamide (AF-2), in two-stage mouse skin carcinogenesis, 49
Butylated hydroxytoluene (BHT) and 3,3′,4′,5,7-pentahydroxyflavone (quercetin) initiating potential of 2-(2-furyl)-3-(5-nitro-2-furyl)-acrylamide (AF-2), butylated hydroxyanisole (BHA), in two-stage mouse skin carcinogenesis, 49

Calcium glucarate, effects of, on the promotion of diethylnitrosamine-initiated altered hepatic foci in rats, 95
CHO cell line, a, resistant to deoxycholic acid, 119
Chrysene metabolism, comparison of, in epithelial human bronchial and Syrian hamster lung cells, 171
Ciprofibrate, a peroxisome proliferator, absence of γ-glutamyltranspeptidase activity in lung metastasis in rats with hepatocellular carcinomas induced by, 65
C-MYC and HLA-DR_α genes in a human B-lymphoid tumor cell line, differential effects of benzamidine derivatives on the expression of, 297
Colonic polyps or cancer, proliferative activity of rectal mucosa and soluble fecal bile acids in patients with normal colons and in patients with, 315
Cryptogenic neoplasm development in C3H mice, hydroxyamine effects on, 73
Cytosolic protein kinase C activity by phytohemagglutinin, antiproliferative response of human leukemic cells. Modulation of, 181

Deoxycholic acid, a CHO cell line resistant to, 119
Diacetoxyscipenol, stimulation of DNA replication in rat esophagus and stomach by the trichothicene mycotoxin, 199
cis-Diamminedichloro-platinum(II) resistant P388 murine leukemia cell line, elevated DNA polymerase beta activity in a, 307
Dietary restriction, cell proliferation and carcinogenic: a preliminary study, 349
Diethylnitrososamine-initiated altered hepatic foci in rats, effects of calcium glucarate on the promotion of, 95

9,10-Dihydrobenzo[*a*]pyrene 7,8-oxide, inversion of enantioselectivity in glutathione conjugation of, in hepatic cytosol of rats following induction of hepatic hyperplastic nodules by chemical carcinogens, 31
7,12-Dimethylbenz[*a*]anthracene, persistence of carcinogenic effect in intact progeny of mice treated tranplacentally with, 231
DNA polymerase beta activity, elevated, in a *cis*-diamminedichloro-platinum(II) resistant P388 murine leukemia cell line, 307
DNA replication, stimulation of, in rat esophagus and stomach by the trichothecene mycotoxin diacetoxyscirpenol, 199
DNA single strand breaks induced by sodium chromate (VI), effects of vitamin E, vitamin B_2 and selenite on, 1
DNA-synthesis and tumor growth inhibitions by AGGA, A bleomycin-amsacrine hybrid derivative, 321

Enantioselectivity, inversion of, in glutathione conjugation of 9,10-dihydrobenzo[*a*]pyrene 7,8-oxide in hepatic cytosol of rats following induction of hepatic hyperplastic nodules by chemical carcinogens, 31

FGF, EGF and PDGF, growth factors in cultured human glioma cells: differential effects of, 283
Food grade beef extracts, comparison of the mutagenic activity of various brands of, 87
2-(2-Furyl)-3-(5-nitro-2-furyl)acrylamide (AF-2), butylated hydroxyanisole (BHA), butylated hydroxytoluene (BHT) and 3,3′,4′,5,7-penta-hydroxylflavone (quercetin), initiating potential of, in two-stage mouse skin carcinogenesis, 49

Gastric carcinogenesis: a model for the identification of risk factors, 149
γ-Glutamyltranspeptidase activity, absence of, in lung metastasis in rats with hepatocellular carcinomas induced by ciprofibrate, a peroxisome proliferator, 65
Glycosphingolipid biosynthesis, antitumor activity via inhibition of, 23

Haematoporphyrin derivative — Part 2, on the nature of the active component of, 9
Harding-Passey mouse melanoma, half-lives of tyrosinase isozymes from, 339
Hematoporphyrin derivative (DHE) as photosensitizing drug: clinical results, photodynamic therapy of spontaneous animal tumors using the active component of, 101
Hepatic hyperplastic nodules, inversion of enantioselectivity in glutathione conjugation of, in hepatic cytosol of rats following induction of, by chemical carcinogens, 31
Hepatic microsomal drug metabolising system, effect of nicotinamide on, in tumour-bearing rats and mice, 107
Hepatocarcinogenicity in female F-344 rats fed di(2-ethylhexyl)phthalate for 2 years, association of persistent peroxisome proliferation and oxidative injury with, 15
Human glioma cells; growth factors in cultured, differential effects of FGF, EGF and PDGF, 283
Hydroxyamine effects on cryptogenic neoplasm development in C3H mice, 73
Hyperplastic nodules induced by 2-acetylaminofluorene, circulating expoxide hydrolase immunodeterminants in rats bearing, 347

Invasive potential of high and low human metastatic variants, a simple quantitative assay for studying the, 137

Lipoidal amine CP-46,665, lack of therapeutic activity of the, in rodent tumors and human non-seminomatous germ cell tumors growing in nude mice, 191

Marycin, observations on the chemical structure and cytotoxic activity of, a hematoporphyrin derivative, 257
Metastic variants, invasive potential of high and low, a simple quantitative assay for studying the, 137
4,4′-Methylene-bis(2-chloroaniline) (MOCA), DNA binding of, in explant cultures of human and dog bladder, 41

Nicotinamide, effect of, on hepatic microsomal drug metabolising system in tumor-bearing rats and mice, 107
N-Nitrosamines in dried chillies, occurrence of volatile, 271
N-Nitrosoephedrine and *N*-nitrosopseudoephedrine: their dissolution, absorption, blood clearance and elimination studies, 329
N-Nitrosopseudoephedrine: their dissolution, absorption, blood clearance and elimination studies, *N*-nitrosoephedrine and, 329

3,3′,4′,5,7-Pentahydroxyflavone (quercetin), initiating potential of 2-(2-furyl)-3-(5-nitro-2-furyl)acrylamide (AF-2), butylated hydroxyanisole (BHA), butylated hydroxytoluene (BHT) and, in two-stage mouse skin carcinogenesis, 49

Phorbol 12-myristate 13-acetate, in vivo induction of tumor variants by, 209

Photodynamic therapy of spontaneous animal tumors using the active component of hematoporphyrin derivative (DHE) as photosensitizing drug: clinical results, 101

Phytohemagglutinin, antiproliferative response of human leukemic cells. Modulation of cytosolic protein kinase C activity by, 181

Proliferative activity of rectal mucosa and soluble fecal bile acids in patients with normal colons and in patients with colonic polyps or cancer, 315

Rabbit epidermal and hepatic microsomes, differential stereoselectivity in the metabolism of benzo[*a*]pyrene and anthracene by, 57

Sapintoxin A. A fluorescent phorbol ester that is a potent activator of protein kinase C but is not a tumour promoter, 165

Selenite, effects of vitamin E, vitamin B_2 and, on DNA single strand breaks induced by sodium chromate (VI), 1

Sodium chromate (VI), effects of vitamin E, vitamin B_2 and selenite on DNA single strand breaks induced by, 1

Somatomedin receptors, presence of, on primary human breast and colon carcinomas, 223

Sulfonated metallophthalocyanines, mechanism of uptake of, by cultured mammalian cells, 215

Tyrosinase isozymes from Harding-Passey mouse melanoma, half-lives of, 339

Urinary bladder carcinogenesis, assessment of L-ascorbic acid requirement for prolonged survival in ODS rats and their susceptibility to, by *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 275

Vitamin E, vitamin B_2 and selenite, effects of, on DNA single strand breaks induced by sodium chromate (VI), 1
